2 October 1969

MEMORANDUM FOR : Chief, Program & Planning Staff

SUBJECT : DIA Augmentation Request - 1969

1. The Research & Engineering Division has reviewed their 1968 request for additional personnel to be supplied by the Defense Intelligence Agency. We still need two GS-12/13 photo technologists. We are primarily interested in people with either degrees in electrical engineering (electronics) or mechanical engineering.

2. In addition, we have an even higher priority requirement for a GS-13/14 optical physicist, preferably a graduate of the University of Rochester or Arizona State University. However, a physics major with considerable work experience in optics would be acceptable.

[Redacted]
Deputy Chief, Research & Engineering Division, TSSG
